

Airport Manager's Report

February 16, 2022

- 1.** The Airport had an incident when a tractor trailer intending on going to the warehouse took a wrong turn down hangar lane. The truck ran over the key pad that controls the gate in between the north and mw hangar. I contacted the trucking company's insurance and already received a quote from Pocono Fence to make the repairs.
- 2.** I have been training the new employee John Myers, it may take a while before he can be on his own but he's doing well.
- 3.** The new T-Hangars have been significantly better since we had them sealed to not let snow drifts in the hangar. However, the ice problem with the East side still persists when the weather is right.
