

Airport Manager's Report November 20, 2019

- Refurbish of Ford F350 is complete. Looks great. Dump bed and frame sand blasted. Bed repaired and painted. Frame coated. Repaired broken spring mount. New tires and alignment.
- M&W hangar was cleaned top to bottom. North hangar floor was cleaned.
- While the lifts used for cleaning were still here they installed the correct size gas pipe to the North hangar heaters. The soot will be cleaned out of the heaters on Wednesday or Thursday.
- BOA inspection report is in. Normal issues. Trees, painting and 5/23 PAPI inspection and documentation. We are addressing these issues. Weight and measures?
- Electricians are looking into the 5/23 runway light pulsing problem.
- Snow removal equipment preparations are being finalized.
